WE HEARD FROM

3,193 people

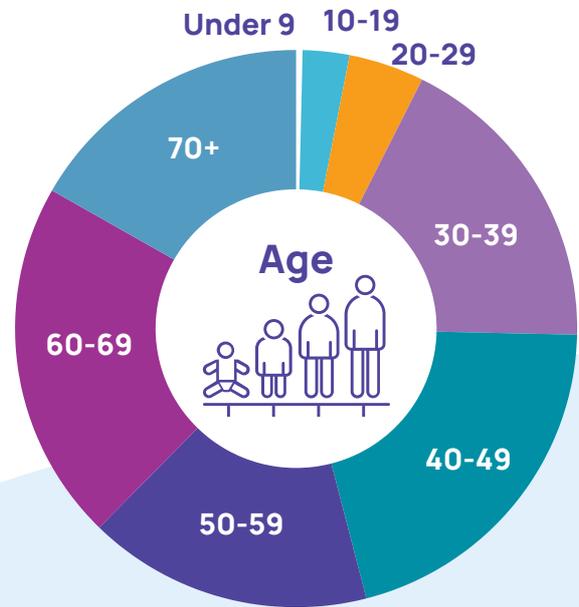

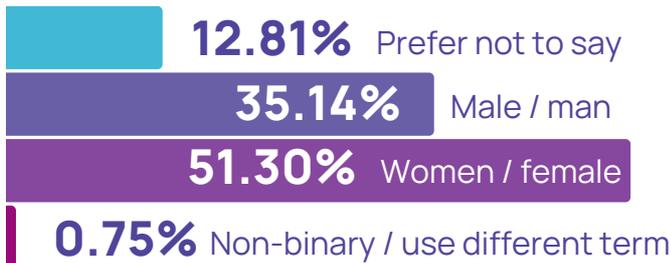

2,912 live in the City of Melville

282 from a migrant background

187 living with a disability

29 First Nations people

Gender

Key areas for future focus

- Community safety
- Sports and recreation
- Seniors services
- Streetscapes, trees and verges
- Sustainable practices
- Responsible growth and development

65.79% think the City's current **vision** is still relevant

What makes our City **UNIQUE**

The most common responses were the water, rivers and foreshores in the City, as well as its accessibility and location.

Fabulous location, close to city, river, port and sea, got everything!

The river as a place for recreation and relaxation.

Established suburbs with a good green canopy of older trees in many areas.

What you **LOVE**

The environment and green spaces, as well as its accessibility and proximity.

I love the parks. They are well maintained. I like that more trees are being planted.

Access to all the things we need in a clean & quiet environment .

We are a good community and have good neighbours.

What could be **ENHANCED**

The environment and development of green spaces, waste collection, transport and the availability of areas for recreation and leisure.

Free verge subsidy to plant trees and vegetation.

Love Melville pool and leisure fit, but prices for memberships are not achievable for everyone.

Transport connections within and outside the City
